

AssureCare Description and History

AssureCare management and certain key personnel have been working together for over 20 years in the healthcare, finance management area.

Commencing with the creation of a third party administration company in 1980, which added a utilization review component in 1982 and expanded across all 50 states within three years. After the sale of our original third party administration, et el, firm in 1987, AssureCare was formed through acquisitions originally, centering in East Lansing, with the actual structure coming together in 1995. In 1996, AssureCare opened offices in Minnesota, followed by Chicago in 1997 and suburban Cleveland in 2001.

AssureCare has differentiated itself by the use of an ASP model to aggregate best in class products and services (applications) to create the ultimate end-to-end solution that is scalable and expandable.

AssureCare reintegrates the various applications (products and services) by utilizing an exclusive database or directory. AssureCare clients have all of the advantages of proprietary ownership of their own healthcare, finance and administration company on an outsource basis.

Richard Agar - AssureCare, CEO

Richard Agar, CEO AssureCare

"Under the current ASO or TPA Approach, our industry mode evolved into a fractured, disjointed, commoditized, unorga collection of services that effectively prevent plan sponsors controlling the cost effectiveness of their Employee B Programs.

Through our Vertically Integrated, Single Source, Accountable Health Plan, along with assured access to care and savings we are able to positively effect our clients bottom line without sacrificing care level or provider accessibility."

"AssureCare is committed to reducing your bottom line through "Hard Dollar Savings"

Customized Solutions for Affordable Health Care
